

NOUVA^{Derm}

ADVANCED SKIN RESURFACING

Why choose NOUVA^{Derm}?

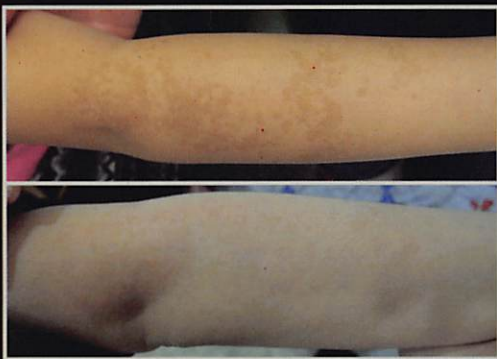

NOUVA^{Derm} represents the latest advancement in skin resurfacing. Whether you're looking to reduce fine lines, improve skin texture, address pigmentation issues, or revitalize your scalp & hair, NOUVA^{Derm} provides a comprehensive solution tailored to your unique scalp & skin care needs.

What can NOUVA^{Derm} treat?

NOUVA^{Derm} is versatile and can be effective for a wide range of skin concerns on the face, neck, chest, arms, hands, & shoulders, including fine lines & wrinkles, sun damage, pigmentation issues, skin texture, & scarring with its unique NOUVAGlo mode. NOUVA^{Derm} also has a custom Hair Support Mode to address and improve hair & scalp concerns.

What can I expect during a NOUVA^{Derm} treatment session?

During the session, the laser is passed over the treatment area, creating a warm, tingling sensation. The procedure duration varies based on the area being treated but typically lasts between 15-30 minutes.

How does NOUVA^{Derm} work?

NOUVA^{Derm} utilizes a state-of-the-art 1927nm thulium laser, designed to penetrate the skin at just the right depth to encourage the body's natural healing process while minimizing downtime. This nonablative laser creates microchannels in the skin, promoting the revitalization of healthy skin cells without damaging the surrounding tissue.

Key Benefits:

- **Minimal Downtime:** Unlike more invasive, similar procedures, NOUVA^{Derm} offers quick recovery times. Most patients experience only mild redness and can return to normal activities within 24 hours.
- **Safe and Gentle:** NOUVA^{Derm}'s nonablative approach ensures that treatments are comfortable and safe for all skin types.
- **Visible Results:** Many patients notice improvements in skin texture, tone, and overall radiance after just one session, with continued enhancement over multiple treatments.

How many treatments will I need?

The number of sessions needed varies depending on the individual's skin condition and desired results. Most patients see significant improvements after 1-3 sessions, spaced 4-6 weeks apart.

What should I expect after the NOUVA^{Derm} treatment?

Post-treatment, you may experience redness and swelling, which usually subsides within a few days. Your skin will naturally exfoliate, revealing fresher, smoother skin. This process can take up to a week.

How should I care for my skin after treatment?

After a NOUVA^{Derm} treatment, moisturize your skin using RE|PAIR Post-Treatment Recovery Serum, avoid sun exposure, and use gentle, natural skincare products. Your practitioner will provide specific aftercare instructions tailored to your treatment.

When will I see results and how long will they last?

Results can be seen within a week, with continued improvement over the next 3-6 months as deeper skin layers produce new collagen. The longevity of results depends on your lifestyle, age, skin condition, and daily skincare regimen.

Ask your provider if NOUVA^{Derm} is right for you. Schedule your consultation today.
